

## TABLE OF CONTENTS

	PAGE
COPY OF COMMISSION.....	5
COPY OF ORDER IN COUNCIL.....	6
REPORT OF ROYAL COMMISSION.....	7
Appendix No. 3—History of Quebec Bridge and Railway Co. to August, 1903.....	12
Appendix No. 4—Phoenix Bridge Co.....	33
Appendix No. 5—Effect of financial limitations upon design of Bridge.....	35
Appendix No. 6—History of development of specifications.....	39
Appendix No. 7—Organizations and staffs maintained by the different corporations interested in the erection of the Bridge.....	48
Appendix No. 8—History of development and plans in designing office.....	56
Appendix No. 9—Material, shopwork and inspection.....	64
Appendix No. 10—Transportation and erection.....	68
appendix No. 11—Difficulties during erection and events at the time of the collapse.....	71
Appendix No. 12—Description of the fallen structure.....	95
Appendix No. 13—Examination of various full-sized column tests made in America, and diagrams showing results.....	105
Appendix No. 14—Comparison of stresses in main trusses with stresses authorized by specifications.....	109
Appendix No. 15—Description of experimental researches.....	110
Appendix No. 16—Discussion of the theory of built-up compression members.....	122
Appendix No. 17—Comparison of the design for chords of the Quebec Bridge with other great cantilever bridges.....	138
Appendix No. 18—Critical discussion of parts of the specifications.....	141
Appendix No. 19—Miscellaneous.....	152
REPORT OF MR. C. C. SCHNEIDER.....	153
Appendix A.—Specifications for loads and strains for cantilever and suspended spans.....	161
Appendix B.—Tabulated statement of strains, sectional areas and unit strains.....	163
Appendix C.—Theory of columns.....	183
Appendix D.—Secondary strains in trusses of Quebec Bridge.....	201
