## PART I

<i>Recommendations and General Considerations</i> . . . . .	1
-------------------------------------------------------------	---

Preamble—Findings and Recommendations—General Considerations—The Scope of the Inquiry—The Importance of the Prairies to Canada's Economy—The Value of Irrigation—The Problem of Palliser's Triangle—Resources of the Basin—Deficiencies in Basic Data—Legal and Constitutional Complications—The South Saskatchewan River Project—The Estimate of Cost—Cost of Pumping Water to Land—Recovery of Cost—Immediate Effects upon The Economy—The Direct Economic Benefits—Hydro-Electric Power Values—Municipal Water Supply—Other Benefits—Summary of Costs and Benefits—The Qu'Appelle Valley—The Delta Region.

## PART II

### *The River Basin and its Development*

#### CHAPTER 1

Introduction and Acknowledgments . . . . .	43
--------------------------------------------	----

#### CHAPTER 2

The Geographical Setting . . . . .	47
------------------------------------	----

General Description—South Saskatchewan Basin—Bed Rock Geology—Relief—Soils—Sand Plains—Natural Vegetation—Climate—Bibliography—Some Present and Potential River Uses—Uses of Water—Mountain and Foothill Region—Western Prairie Region—Central Prairie Region—Delta Area—The Lakes Region—The Nelson River—Bibliography.

## CHAPTER 3

The Historical Setting . . . . .	71
I. National Policy and Western Canadian Development — Formulation of National Policy — Western Territories: American Experience — Settlement Prospects in Canadian West — Relationship between South Saskatchewan and Qu'Appelle Rivers — Varying Degrees of Aridity within the Arid Zone — II. Preparation for Settlement in the Canadian West — Confederation and Communications — Dominion Lands Policy — Western Development in the Period from 1867 to 1900 — Improvements in Agricultural Practices: Red Fife and Summer-fallow — III. Establishment of the Canadian Wheat Economy, 1900 to 1930 — Defensive and Economic Aspects of Western Development — Capital Requirements of Prairie Development — Population and Homestead Entries — Agricultural Occupation of Western Lands — Delay in Occupation of Short-grass Plains — Re-introduction of Pre-emption Principle — Relationship between American and Canadian Frontier — Crop Experience on the Canadian Short-grass Plains — Agricultural Investigations in Saskatchewan and Alberta, 1920-21 — Agricultural Re-adjustment during the Nineteen-Twenties — IV. The Disastrous Decade, 1930-39 — Production Record — Price Record — Income, Relief and Debt — Population Movements — Rehabilitation — Summary — V. Effects of Second World War on Prairie Economy — Wheat and Wartime Agricultural Policy — Cash Income and Its Uses — Population Movements during the Forties — Conclusion.	

## CHAPTER 4

Irrigation in Western Canada . . . . .	131
Introduction — Federal Participation — Corporate Irrigation Development — Alberta Railway and Irrigation Company — Canadian Pacific Railway — Canada Land and Irrigation Company — Present Status of Irrigation Projects — General Progress — Problems of Irrigation Development — Engineering — Colonization — Financial Problem.	

## CHAPTER 5

Legal and Constitutional Aspects . . . . .	159
A. Memorandum by John J. Connolly, Q.C. B. Memorandum by H. C. Goldenberg, Q.C.	

## CHAPTER 6

The South Saskatchewan River Project . . . . .	179
Engineering Features — Selection of Site — Main Dam — Spillway — Outlet Works — Reservoir — Qu'Appelle Valley Dam — Hydrology — Water Utilization — Pertinent Data — Agronomic Aspects — Prevailing Temperatures and Frost Free Season — Growing Season — Hours of Sunshine — Soils — General Appraisal — Irrigation Factors and Water Supply (Memorandum by D. W. Hays) — Irrigation requirements — Use of Water on Large Projects — Variation of Factors — Proportionate Use of Water in Irrigation Season — Estimated Use of Water on South Saskatchewan Project — Power Requirements — Relation of Water Requirements to Water Supply — Maximum Power Plant Capacity — Cost of Pumping Water to Land — Proposed Enlargement of Reservoir — Memorandum on Red Deer River Project.	

## CHAPTER 7

An Estimate of Cost . . . . .	227
The Mannix Ltd. Report.	

## CHAPTER 8

Long-Run Economic and Social Benefits . . . . .	235
Introduction — Problem of Identification of Benefits of Public Investment — Primary or Direct Economic Benefits — Assumptions Employed in Determination of Economic Returns — Estimates of Direct Returns to Irrigation — Direct Returns to Power — Direct Benefits to Municipal Water Supplies — Secondary or Indirect Benefits — Indirect Benefits Within Agriculture — Indirect Benefits Outside Agriculture — Indirect Benefits to Governments — Social Benefits — Appendix: Farm Budget.	

## CHAPTER 9

The Immediate Impact on the Economy . . . . .	257
General Considerations — Note on Methods of Financing the Project — Prospective Annual Outlays — Annual Outlays Compared with Investment in Canada and in Prairie Region — Economic Resources Required by Project — Materials — Labour — Machinery and Equipment — Conclusion.	

## PART III

Appendix . . . . .	275
Submissions — Individuals and Organizations — Manitoba — Saskatchewan — Alberta.
