Canadian Heritage Proprietary Questions – Reconnecting Government With Youth

Data Report

Submitted to:

Department of Canadian Heritage

July 21, 2005

METHODOLOGY

This 2005 edition of *Reconnecting Government with Youth* presents findings mainly from a national telephone survey conducted in May/June of 2005. The *Internet Usage* chapter is based on an online survey methodology. Many of the chapters also present tracking data from earlier *Reconnecting Government with Youth Studies*.

The following is a detailed summary of the research methodology used for this study. For further information regarding the research methodology in this syndicated study, please contact Brooke Pigott, Research Manager. She can be reached at 613-241-5802 or at Brooke.Pigott@ipsos-reid.com.

Telephone Survey

The major component of these research results presented here is based on a nation-wide telephone survey of 2,001 young Canadians aged 18 to 30 years. The survey took place between May 18th and June 13th, 2005. The overall margin of error for a sample of this nature is ±2.2 percentage points, 19 times out of 20. The margin of error will be larger for sub populations. The following outlines regional sample sizes and associated margin of error.

Reconnecting Government with Youth Telephone Survey

Region	Un-weighted Sample Size	Margin of Error
Atlantic	196	±7.5
Quebec	550	±4.5
Ontario	600	±4.1
Manitoba/Saskatchewan	150	±7.0
Alberta	200	±5.8
British Columbia	305	±7.1
Canada	**2,001**	**±2.2**

Weighting

In terms of the survey data preparation, the data are examined against the population in question's characteristics and adjusted by region, age and gender to ensure representativeness by these key variables. Both the telephone and online survey samples for this study have been weighted and are representative of Canada's regional, age and gender composition for 12 to 30 year olds in accordance with Census 2001 data.

CANADIAN STUDIES

9. Please indicate which of the following methods you CURRENTLY USE to learn about Canada, its history, people and institutions.

Proportions/Means: Columns Tested (5% risk level) - A/B/C/D/E/F - G/H/I - J/K
* small base; ** very small base (under 30) ineligible for sig testing
