

*THEORY AND APPLICATIONS OF CATEGORIES*

Volume 11, 2003

Categorical models and quasigroup homotopies George Voutsadakis	1
Morphisms and modules for poly-bicategories J.R.B. Cockett, J. Koslowski, and R.A.G. Seely	15
The branching nerve of HDA and the Kan condition Philippe Gaucher	75
Isomorphisms between left and right adjoints H. Fausk, P. Hu, and J.P. May	107
The Wirthmüller isomorphism revisited J.P. May	132
Characterization of protomodular varieties of universal algebras Dominique Bourn and George Janelidze	143
Resolutions by polygraphs François Métayer	148
Cubical sets and their site Marco Grandis and Luca Mauri	185

Characterization of Pointed Varieties of Universal Algebras with Normal Projections Zurab Janelidze	212
Some algebraic applications of graded categorical group theory A.M. Cegarra and A.R. Garzón	215
Continuous categories revisited J. Adámek, F. W. Lawvere, J. Rosický	252
Ring epimorphisms and $C(X)$ Michael Barr, W.D. Burgess and R. Raphael	283
Partial toposes Jean Bnabou and Thomas Streicher	309
Some calculus with extensive quantities: wave equation Anders Kock and Gonzalo E. Reyes	321
Exponentiability in categories of lax algebras Maria Manuel Clementino, Dirk Hofmann and Walter Tholen	337
The category of opetopes and the category of opetopic sets Eugenia Cheng	353
Modules J.R.B. Cockett, J. Koslowski, R.A.G. Seely, and R.J. Wood	375
Symmetric monoidal completions and the exponential principle among labeled combinatorial structures Matias Menni	397
Composition-representative subsets Gary Griffing	420
The strong amalgamation property and (effective) codescent morphisms Dali Zangurashvili	438

THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication.

The method of distribution of the journal is via the Internet tools WWW/ftp. The journal is archived electronically and in printed paper format.

Subscription information. Individual subscribers receive (by e-mail) abstracts of articles as they are published. Full text of published articles is available in .dvi, Postscript and PDF. Details will be e-mailed to new subscribers. To subscribe, send e-mail to `tac@mta.ca` including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor, Robert Rosebrugh, `rrosebrugh@mta.ca`.

Information for authors. The typesetting language of the journal is  $\text{T}_{\text{E}}\text{X}$ , and  $\text{L}^{\text{A}}\text{T}_{\text{E}}\text{X}$  is the preferred flavour.  $\text{T}_{\text{E}}\text{X}$  source of articles for publication should be submitted by e-mail directly to an appropriate Editor. They are listed below. Please obtain detailed information on submission format and style files from the journal's WWW server at <http://www.tac.mta.ca/tac/>. You may also write to `tac@mta.ca` to receive details by e-mail.

#### Editorial board.

John Baez, University of California, Riverside: `baez@math.ucr.edu`  
 Michael Barr, McGill University: `barr@barrs.org`, *Associate Managing Editor*  
 Lawrence Breen, Université Paris 13: `breen@math.univ-paris13.fr`  
 Ronald Brown, University of Wales Bangor: `r.brown@bangor.ac.uk`  
 Jean-Luc Brylinski, Pennsylvania State University: `jlb@math.psu.edu`  
 Aurelio Carboni, Università dell'Insubria: `aurelio.carboni@uninsubria.it`  
 Valeria de Paiva, Palo Alto Research Center: `paiva@parc.xerox.com`
