

THEORY AND APPLICATIONS OF CATEGORIES

Volume 7, 2000

On branched covers in topos theory Jonathon Funk	1
A pseudo representation theorem for various categories of relations M. Winter	23
Pure morphisms of commutative rings are effective descent morphisms for modules – a new proof Bachuki Mesablishvili	38
On saturated classes of morphisms Carles Casacuberta and Armin Frei	43
Factorization systems for symmetric cat-groups Stefano Kasangian and Enrico Vitale	47
Balanced coalgebroids Paddy McCrudden	71
On the monadicity of categories with chosen colimits G. M. Kelly and Stephen Lack	148

\mathcal{M} -Completeness is seldom monadic over graphs
J. Adámek and G.M. Kelly

171

Normal functors and strong protomodularity
Dominique Bourn

206

Central extensions in Malt'sev varieties
G. Janelidze and G.M. Kelly

219

On the object-wise tensor product of functors to modules
Marek Golasinski

227

Quasi-varieties of presheaves
Enrico M. Vitale

236

Solution manifolds for systems of differential equations
John F. Kennison

239

A simplicial description of the homotopy category of simplicial groupoids
A. R. Garzon, J. G. Miranda and R. Osorio

263

Geometric and Higher Order Logic in terms of Abstract Stone Duality
Paul Taylor

284

THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication.

The method of distribution of the journal is via the Internet tools `WWW/ftp`. The journal is archived electronically and in printed paper format.

Subscription information. Individual subscribers receive (by e-mail) abstracts of articles as they are published. Full text of published articles is available in .dvi, Postscript and PDF. Details will be e-mailed to new subscribers. To subscribe, send e-mail to `tac@mta.ca` including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor, Robert Rosebrugh, `rosebrugh@mta.ca`.

Information for authors. The typesetting language of the journal is $\text{T}_{\text{E}}\text{X}$, and $\text{L}^{\text{A}}\text{T}_{\text{E}}\text{X}$ is the preferred flavour. $\text{T}_{\text{E}}\text{X}$ source of articles for publication should be submitted by e-mail directly to an appropriate Editor. They are listed below. Please obtain detailed information on submission format and style files from the journal's WWW server at <http://www.tac.mta.ca/tac/>. You may also write to `tac@mta.ca` to receive details by e-mail.
