

EVERYTHING STARTED THAT DAY, THAT WAY

STEP 1: CLEAR THE AREA OUT OF WEED

WELL I FEEL SORRY FOR ALL THOSE PRETTY LITTLE FLOWERS YOU'RE PULLING UP...
HERE WE GO AGAIN!

STEP 2: DIG A HOLE DOUBLE THE SIZE OF THE ROOT BALL YOU ARE GOING TO PLANT

YOU'RE DIGGIN IT TOO SMALL!!
WILL YOU LEAVE ME BE!

STEP 3: FILL THE BOTTOM WITH STONES TO FAVOR THE DRAIN

I'M SUFFOCATING! ARF! ARF!
OF COURSE, YOU'RE NOT USED TO DOING THIS... DO YOU THINK THERE'LL BE ENOUGH LITTLE STONES?

STEP 4: ADD A LAYER OF MANURE MIXED WITH SURFACE LAND

WELL, THIS IS READY TO GO. YOU MAY BRING THE LITTLE TREE NOW... CAREFUL...
SURE, IT'S JUST A BABY!

STEP 5: PLACE THE TREE INTO THE HOLE WITH ITS ROOTS SPREAD OUT

I THINK WE'RE GOOD. DO YOU SEE IT STRAIGHT?
HEY, THIS IS NOT PRECISION ENGINEERING.
MMM... A TEEENY BIT TOWARDS YOUR SIDE...

STEP 6: FILL THE HOLE WITH THE REMAINING LAND, FIXING THE POSITION OF THE TREE

BRING ME A JEM-JOHN OF WATER. THIS IS READY TO GO.
ALL RIGHT, I'M TAKING THIS JUNK BY THE WAY.

EVERYTHING STARTED THAT DAY, THAT WAY

STEP 7: SLIGHTLY TAMP THE LAND

WAIT! LEAVE THE MANURE, I'M GOING TO ADD SOME MORE. OK, HERE YOU ARE. I HAVEN'T BEEN ABLE TO LIFT IT ANYWAY.

STEP 8: FERTILIZE THE SURFACE AVOIDING CONTACT WITH THE TREE

ARGH! IT DOES WEIGH A LOT. PUUGH! IT SMELLS REAL BAD.

STEP 9: DIG AN IRRIGATION CHANNEL AROUND THE TREE SO NO WATER IS WASTED

COME ON! HERE WE GO DIGGING DITCHES AGAIN! AW, THIS WATER CAN WEIGH LIKE HELL!

STEP 10: IN THE END, WATER THE TREE

YOU ARE QUITE AN ASSISTANT... WELL, THIS WILL BE ENOUGH FOR NOW. HOW CUTE, ISN'T IT? WE NEED TO PUT IT A NICE NAME...

WELL, IT LOOKS QUITE GOOD, ALTHOUGH MY BACK ACHES SO MUCH I'M NOT GOING TO BE ABLE TO MOVE, COME TOMORROW. HEE, HEE, HEE, I LOVE IT! WILL I NOTICE HOW IT GROWS IF I STARE FOR A LONG WHILE? WELL, COME ON, THERE'S STILL WORK LEFT TO DO, UH?

I GOT OTHER SIX LITTLE TREES IN THE SHED. LET'S GO! WE'VE GOT ALL MORNING AHEAD OF US... WHAT'S THE MATTER? ARE YOU CRYING?
