Appendix B – Endnotes

# 5.1 Introduction

This section provides an explanation of the authority classification which, for government-wide reporting purposes, identifies the authority codes required for accounting transactions.

The primary purpose of the authority codes is to identify expenditure transactions for accountability and reporting in the *Public Accounts of Canada* according to the specific votes and other authorities in the Estimates, other authorities included in specific statutes; and in addition, to identify the nature of revenue, by tax and non-tax revenue. Other authority codes (non-appropriated authorities) are also established by central agencies to facilitate the identification of various accounting transactions that do not require the use of appropriations.

An appropriation is an authority of Parliament to pay money out of the Consolidated Revenue Fund (CRF) and as such, provides parliamentarians with control over most expenditures of the government. As a general rule, transactions are recorded against an appropriation on an expenditure basis; however, there are certain expenditures that are not charged to an appropriation until a payment is required.

The authority code identify expenditures transactions as follows:

- **Statutory expenditures**

Statutory expenditures are those that Parliament has approved through legislation (other than Appropriations Act) that set out the purpose of the expenditures and the terms and conditions under which they may be made.

- **Non-statutory expenditures**

Non-statutory expenditures are those that Parliament approves annually through an *Appropriation Act*. Once approved the vote wording and the expenditure authority attributable to each vote become the governing conditions under which these expenditures may be made.

- **Non-appropriated transactions**

Non-appropriated authority codes identify accounting transactions that do not require the use of appropriations (i.e., expenditure or revenue are already recognized or expenditure is not charged to appropriations until the payment is required ).

## 5.1.1 Classification for the authority codes

The authority codes are designed to identify accounting transactions as being:

- **Budgetary expenditures** Budgetary expenditures that are made in accordance with specific votes or other authorities in the Estimates, or to statutory appropriations or other authorities included in various statutes and elsewhere. Budgetary expenditures consist of the cost of servicing the public debt; operating and capital expenditures; transfer payments to other levels of government, organizations or individuals; and payments to Crown

corporations.

- **Budgetary revenue** Budgetary revenue related to tax revenue and user charges, payable or charged based on specific legislation, regulations or contracting authority. All tax revenue are statutory and the non-tax revenue authority codes identify the basis under which departments charge users for the provision of products or services and includes goods, regulatory and optional services, information products, use of public facilities and rights and privileges (licences, permits, patents, copyrights, etc.).
- **Non-budgetary authorities** Non-budgetary authorities that comprise assets and liabilities transactions for loans, investments and advances, or specified purpose accounts, that have been established under specific statutes or under non-statutory authorities in the Estimates and elsewhere. Non-budgetary transactions are those expenditures and receipts related to the government's financial claims on, and obligations to, outside parties. These consist of transactions in loans, investments and advances; in cash and accounts receivable; in public money received or collected for specified purposes; and in all other assets and liabilities. Other assets and liabilities, not specifically defined in G to P authority codes are to be recorded to an R authority code, which is the residual authority code for all other assets and liabilities.
- **Non-appropriated authorities** Non-appropriated authorities are established as central agency requirements to facilitate the identification of transactions that do not require the use of appropriations (for example, amortization expenses for capital assets or the allowance for severance pay which is not charged to an appropriation until a payment is required).

# 5.2 Authority codes Summary for 2018 to 2019

# Appendix B – Endnotes

1. Specific revolving funds involved to be determined.
2. Not to be used for travellers cheques issued on a consignment basis.
3. In their departmental systems, departments will need to note the statutes under which all their user charges are made and collected.
4. The breakdown of the codes to be used for user charges is the same for all departments.
5. Any Specified Purpose Account set up in accordance with a specific statute or other requirement must be recorded in the accounts in departmental systems to meet the specified reporting requirements. To assist in the transition to the revised reporting requirements for Specified Purpose Accounts (SPAs), all SPA's are being listed in the L, M, N and P codes in the CFMRS. In particular the SPA's are in codes L2, M1, N3, N5 to N8 and P2 to P8.
6. Departments are to substitute the A with a 0 if they only have one program. However, for a department that has more than one program, the A would be substituted sequentially, by 1 for the first program and 2 for the second program etc.
