# 4.1 Introduction

This chapter provides an explanation of the financial reporting account (FRA) classification structure and contents, which for government-wide reporting purposes, identifies the relevant asset, liability, net assets/equity, revenue and expense accounts that are required for financial reporting (maintaining accounts in the general ledger) and for preparing the consolidated financial statements for the Government of Canada.

The basis for coding the FRA classification is accrual accounting which requires transactions to be recorded in the period when they occur (and not only when cash or its equivalent is received or paid). Therefore, the transactions and events are recorded in the accounting records and recognized in the financial statements of the periods to which they relate. The elements recognized under accrual accounting are assets, liabilities, net assets/equity, revenue and expenses.

## 4.1.1 Accounting manual

The Financial Information Strategy Accounting Manual URL:

<http://www.tbs-sct.gc.ca/pol/doc-eng.aspx?id=12182> provides guidance on the appropriate coding for financial transactions. It should be read in conjunction with the Directive on Accounting Standards, Appendix A: Standard on the Government of Canada Accounting Handbook (GCAH) URL:

<http://www.tbs-sct.gc.ca/pol/doc-eng.aspx?id=32499>; which is the authoritative accounting reference manual. The GCAH states the Government's accounting choices where options exist under Public Sector Accounting Standards (PSAS), provides the Government's accounting policies in the absence of specific PSAS, and provides specific policies relevant to departmental financial statements or quarterly financial reports.

The accounting manual also gives examples of most routine transactions and many complex ones that are unique to government and highlight differences between reporting on an accrual accounting basis, accounting for authorities, and reporting by objects. The Receiver General manual, chapter 10 "Accounting entries" provides additional examples of accounting entries and serve to supplement the Financial Information Strategy Accounting Manual.

## 4.1.2 Financial reporting account utilization

The Financial reporting accounts (FRAs) included in the departmental Central Financial Management Reporting System (CFMRS) monthly trial balances contain the data needed by the Receiver General (RG) to prepare the financial statements on a monthly and annual basis. Monthly government-wide financial statements are included in the Monthly Statement of Financial Operations (MSFO), which is used by the Department of Finance Canada to produce the results issued in the monthly Fiscal Monitor. The government's annual financial statements are audited by the Auditor General and are included in the Public Accounts of Canada that are tabled, each fall, in Parliament. These statements are also included on a consolidated basis in the Annual Financial Report of the Government of Canada, which is published by the Minister of Finance.

## 4.1.3 Structure for the financial reporting accounts

The financial reporting account (FRA) structure is designed to identify accounting transactions as follows:

**Assets** are economic resources controlled by an entity as a result of past transactions or events and from which future economic benefits may be obtained. The assets are classified as being either financial assets (cash, accounts receivable, and loans, investments and advances, etc.) and non-financial assets (inventories, buildings, machinery and equipment, capital leases and work in progress, etc.).

**Liabilities** are financial obligations to outside organizations and individuals as a result of transactions and events on or before the accounting date. Liabilities are the result of contracts, agreements and legislation in force at the accounting date that require the government to repay borrowings or to pay for goods and services acquired or provided prior to the accounting date. The liabilities generally consist of accounts payable, accrued interest payable, accrued salaries and wages, superannuation, public debt, etc.

**Net assets/liabilities** represent the difference between total assets and liabilities. When the total assets exceed total liabilities, the resulting amount represents net assets. When total liabilities exceed total assets, the resulting amount represents net liabilities. The net assets/liabilities consists of two categories; unrestricted net assets/liabilities and restricted net assets/liabilities. Following the end of each fiscal year, the net balances from the revenues, expenses and departmental payment, payroll, interdepartmental settlement (IS), and deposit control accounts, as well as 35ddd (Organization Transfer out/in), 36ddd (Opening Balance Adjustments), 37ddd (Capital Assets Transfer Out/In Offset) and 38ddd (Accounts Receivable – Transition Payment Transfer Out/In Offset accounts) are converted as appropriate into the new year opening balance of the unrestricted net assets/liabilities or the restricted net assets/liabilities account(s).

**Revenues** are increases in economic resources, either by way of inflows or enhancements of assets or reductions of liabilities, resulting from the ordinary activities of a department. They can result from activities such as tax revenue, the sale of goods or services, gain on sales of assets, interest and penalties earned on tax and non-tax revenue, and return on investments.

**Expenses** are the cost of resources consumed in and identifiable with the operations of the accounting period. Examples of expenses include operating expenses, grants and contributions, salaries, etc.

**Cash reconciliation control** accounts are similar to a bank account. However, since the cash accounts are restricted to the Receiver General (that is, consolidated revenue fund), departments are required to use the cash reconciliation control accounts. The major difference between the control accounts and bank accounts is that control accounts are closed into net assets/liabilities at year end after all other closings have been done.

42117	2020-01-16	Create	New code
42151	2020-01-16	Suspended	Suspension of code
5113A	2020-01-09	Modify	New code. Alphanumeric format used due to the lack of available codes. The affected departments have been consulted.
5113B	2020-01-21	Activated	New code. Alphanumeric format used due to the lack of available codes. The affected departments have been consulted.

# Appendix B – Endnotes

1. Accrual for goods and services received, but invoice has not yet been received and also includes accrual of estimated amounts set up at year-end under PAYE.
2. The breakdown for accumulated amortization must fit into the breakdown required in the **Policy on the Capitalization of Assets**. Separate accounts will be needed in departmental systems for each type of capital asset.
3. For material amounts not yet billed.
4. Assets under construction will be recorded as work in progress and on completion will be re-allocated to the capital asset account(s) that describes the asset.
5. All inventories held for future program outputs and/or further processing. Inventories held for resale are to be included in the FRA group 1512.
6. Not to be used by departments until the responsibility for the allowances for valuation is transferred to departments.
7. These accounts will be used by departments; the amounts in these accounts will be transferred on consolidation in the CFMRS to FRA 41315. They should be cleared to CCRA by I.S. prior to March 31 of each year.
8. These advances may be for travel or for petty cash purposes.
9. Many of these advances are charged to departmental appropriations in the Authority codes at the time the advance is made, and then recorded at year-end as an asset in the Financial Reporting Accounts (if it has not been re-paid).
10. These payments are made to the private sector only (See account 13234 for payments made to national governments).
11. Breakout by province or territory of these accounts is not required centrally. Departments will need to keep data by province in their departmental systems to meet annual Public Accounts requirements.
12. Departments will be required to identify loans and advances of less than one year in their departmental systems, so the amounts are available at year-end for supplementary analysis purposes.
13. The balance in this account **must** be zero at year-end.
14. Credit side of these accounts are in 2541 series.
15. Capital lease obligations for these assets are included in 242.
16. Deductions include those for Supplementary Death Benefits.
17. Last digit in the account numbers identifies the relevant calendar year.
18. Details for these accounts are in the Authority code.
