7.1 Introduction

This chapter provides information on the object code classification and includes in Section 7.2 the list of object codes as follows:

- Objects of expenditure
- Objects for revenue and
- Objects for assets, liabilities and other transactions.

The object classification is a field of the government-wide coding block that identifies the type of goods or services acquired, the transfer payments made, the source of revenue or the cause of increases or decreases in assets and liabilities.

The object information provides:

- A method for classifying and coding transactions to permit the reporting of information about the nature of transactions in the Estimates and in the Public Accounts
- A standard classification of transactions for internal departmental analysis and central management purposes and
- The basis used by Statistics Canada to determine and report more accurately the impact of government revenues and expenditures on the rest of the economy. This information is based on Statistics Canada's North American Product Classification System (NAPCS) Canada 2017

In addition, the object coding provides a repository of government-wide information, which can be used by central agencies without requiring departments and agencies to respond to numerous individual requests.

7.1.1 Object classification structure

To accommodate the need for various degrees of detail, other levels of object classification are used. In descending order of aggregation after categories and standard objects, there are reporting objects and economic, source and class objects.

Categories (the first digit)

This is the highest level of object aggregation. There are mainly eleven categories in the lists of Objects and are as follows:

- **Objects** of expenditure comprise 4 categories, which are services, goods, land, buildings and works, transfer payments and other expenditures
- **Objects for revenue** comprise 2 categories, which are tax revenue and other revenue. Tax revenue consists of an object for tax revenues and other revenue is identified such as rights and privileges, leases, sales of goods and products, services, return on investments and miscellaneous other revenue
- **Objects for assets, liabilities and other transactions** comprise 5 categories, which are assets, liabilities, other, accumulated deficit and identification of partnering department for interdepartmental settlement transactions

Standard objects (01 to 12)

Standard objects are the highest level of object classification used for parliamentary and management purposes, and are used to report information in the Estimates and Public Accounts. They apply to expenditures only. (Refer to Section 7.1.4 for a brief explanation of each standard object as presented in the Estimates). The allocation of the categories by standard object is as follows:

Category 0 – Services includes the following standard objects:

- 01. Personnel
- 02. Transportation and communications
- 03. Information
- 04. Professional and special services
- 05. Rentals
- 06. Repair and maintenance.

Category 1 – Goods, land, buildings and works includes the following standard objects:

- 07. Utilities, materials and supplies
- 08. Acquisition of land, buildings, and works
- 09. Acquisition of machinery and equipment

Category 2 – Transfer payments include the following standard object:

- 10. Transfer payments

Category 3 – Other expenditures include the following standard objects:

- 11. Public debt charges
- 12. Other subsidies and payments

Sub-categories (the first two digits)

Sub-categories are a primary breakdown of each category. In many cases, they are the same as the standard objects.

Reporting objects (the first three digits)

Reporting objects are a sub-division of sub-categories, which are used for central management purposes.

Economic, source and class objects (the four digits)

Economic, source and class objects are the lowest levels of object classification used for government-wide reporting purposes. **Economic objects** apply to expenditures only and measure the impact of government transactions on the economy. The expenditures are classified according to the type of resources (goods and services) acquired or the transfer payments made. **Source objects** identify the origin of a receipt and apply to tax revenue and other revenue. **Class objects** identify the causes of increases or decreases to financial claims or obligations.

As most departments or agencies require more detail, transactions may be classified by departmental line object in the departmental system. To permit the consolidation and comparison of information from all departments, the line

objects must be aligned with the objects prescribed in Section 7.2.

7.1.2 Maintenance of object codes

List of objects

The object codes that are to be recorded for expenditures, revenue, assets, liabilities, and other transactions are listed on the government-wide chart of accounts (COA) website as Section 7.2. The list is updated regularly to include all changes made to the object codes.

List of descriptions

Interpretation and analysis of financial information require the classification and coding of transactions to be correctly and consistently applied.

To help departments and agencies improve accuracy and consistency in the coding of their financial transactions, the descriptions are included in the detailed list of object codes included in Section 7.2.

To maximize the use of the detailed descriptions, departments should review it carefully to ensure that the alignment of their line objects is correct. Where applicable, a copy of the relevant descriptions should also be made available to departmental personnel involved in coding to help ensure consistent coding and reporting, both within the department and within the government as a whole.

7.1.3 Pay entitlement codes

A pay entitlement code classifies the type of remuneration paid to employees pursuant to a collective bargaining agreement, the terms and conditions of employment, or other arrangements. These codes are issued to departments and agencies by Public Works and Government Services Canada (Compensation Sector). The pay entitlement codes are listed with the lists of Objects to improve consistency and accuracy in the alignment of pay entitlement codes to economic objects mainly in standard object 01. The list of pay entitlement codes is included in Section 7.4.

Such installations include telephone exchanges; broadcasting, radio and television relay and booster stations; data centres; and text/word processing centres. **Note:** Repair of buildings that are not completely dedicated to telecommunication computers or automated office systems facilities will be classified under the object that describes the type of building e.g. object 0630 should be used for repairs to office buildings.

0645 Other buildings

Description:Repair to any types of buildings not specified in objects 0630 to 0640 inclusive and object 0646. Such buildings include farm buildings, bunk houses and dormitories, bush depots and camps, aircraft hangars, armouries, barracks and drill halls, passenger terminals such as air, bus, boat, etc. and laboratories.

0646 Residential buildings

Description:Repair to residential buildings such as houses and apartments. It excludes repairs to barracks. **Note:** Repairs to barracks should be included in object 0645.

065 Repair of machinery and equipment

Description:Repairs and maintenance to various types of machinery and equipment.

0655 Processing machinery

Description:Repair and maintenance of machinery are described in chapters 84 to 85 of the Statistics Canada publication titled Standard Classification of Goods such as ploughs, barrows, manure spreaders, etc. It includes agricultural and implements machinery and machinery used for mining, oil and gas construction, machine tools, printings, boilers, engines, generators, conveying and elevating equipment, etc.

0656 Heating, air-conditioning and refrigeration equipment

Description:Repair and maintenance of equipment classified in chapter 84 of the Statistics Canada publication on the Standard Classification of Goods for heating, air-conditioning, and refrigeration equipment.

0658 Electric lighting, distribution and control equipment

Description:Repair and maintenance of equipment described in chapters 85 and 94 of the Statistics Canada publication on the Standard Classification of Goods for electric lighting, distribution, and control equipment.

0660 Measuring, controlling, laboratory, medical and optical instruments, apparatus and accessories

Description:Repair and maintenance to measuring, controlling, laboratory, medical and optical instruments, apparatus and accessories excluding X-ray equipment. The type of equipment is classified in chapter 90 of the Statistics Canada on the Standard Classification of Goods. **Note:** X-ray equipment should be included in object 0665.

- 0664 Communications/Networking equipment (includes analog, digital and combined analog/digital equipment, cabling, parts and peripherals)
Description:Repair and maintenance of communications/networking equipment and systems (includes analog, digital, combined analog and digital equipment, cabling, parts and peripherals). It excludes equipment provided as a component of a service supplied by telecommunications service providers, including common carriers. Notes: 1. Equipment provided by telecommunications service providers as part of a service is to be classified under object code 0230 or 0231, as applicable.
- 0665 Other equipment
Description:Repair and maintenance of equipment not specified in object codes 0656 to 0660 inclusive, and which are classified in various chapters of the Statistics Canada publication on the Standard Classification of Goods. It includes service industry equipment, vending machines, lawn mowers, and X-ray and related equipment, safety and sanitation equipment, alarm and signal systems, other electric equipment and appliances, and office, household and special purpose furniture and fixtures.
- 0668 Image/Video communications equipment (includes telepresence/video conferencing equipment, cabling, parts and peripherals)
Description:Repair and maintenance of image/video communication equipment (including telepresence/video conferencing equipment, cabling, parts and peripherals, as well as the repair and maintenance of optical character readers associated with communications systems, television, and other video communications equipment and facsimile, facsimile-image transfer switches etc.). It excludes repair and maintenance of equipment provided as part of a service supplied by telecommunications common carriers or other telecommunications service providers. Notes: 1. Equipment provided by an image/video service provider is to be classified under object 0232.
- 0671 Other office equipment
Description:Repair and maintenance of office equipment such as electronic accounting machines, calculators, word processors, typewriters, composing, micrographics, reproducing machines and photocopiers. Also included is the repair and maintenance of all office machines and equipment not elsewhere classified. Such non-electronic or non-automated equipment includes adding machines, calculators, cash registers, Dictaphones, tape recorders and reproducing machines. It excludes the repair of office furniture and fixtures. **Note:** The repair of office furniture and fixtures should be included in object 0665.
- 0672 Computer equipment related to production and operations (P&O) environment - All servers, storage, printers, etc. (includes all related parts and peripherals)
Description:Repair and maintenance of all Computer Servers (including mainframes) and related components/peripherals associated with the Production and Operations (P&O) or Data Center Environment. This includes central processing unit, peripherals, printers, data entry, data capture or storage devices, as well as all related parts and/or components. Notes: 1. Repair and maintenance of DCE related

workstations, etc., and associated components are to be included under object code 0673; 2. License/maintenance fees of server related computer software are to be included under object code 0584.

0673 Computer equipment related to Distributed Computing Environment (DCE) - Desktop/personal/portable (includes all related parts and peripherals)

Description:Repair and maintenance of all Computers Equipment and associated components related to the Distributed Computing Environment (DCE), including the repair and maintenance of desktops, personal computers, mobile/portable workstations, hand-held computing devices and special function or high-end workstations. Includes repair and maintenance of all related parts and peripherals
Notes: 1. Costs for the repair and maintenance of servers (in Production and Operations or Data Centers) and server related components are to be included under object code 0672; 2. License/maintenance fees of DCE related computer software are to be included under object code 0582.

0675 Ships and boats

Description:Repair and maintenance of ships and boats classified in chapter 89 of the Statistics Canada publication on the Standard Classification of Goods such as cargo ships, warships, passenger ships, ferries, marine engines, etc.

0676 Aircraft

Description:Repair and maintenance of aircraft classified in chapter 88 of the Statistics Canada publication on the Standard Classification of Goods such as fixed wing or rotary wing aircraft, engines, equipment, etc.

0681 Road motor vehicles - Military

Description:Repair and maintenance of military road motor vehicles classified in chapter 87 of the Statistics Canada publication on the Standard Classification of Goods such as trucks, trailers, etc.

Department(s) specific:

Also includes acquisition of optical character readers associated with communications systems, television, and other video communications equipment and facsimile, facsimile-image transfer switches, etc. It excludes acquisition of equipment provided as part of a service supplied by telecommunications common carriers or other telecommunications service providers. **Notes:** 1. Equipment provided by an image/video service provider is to be classified under object code 0232.

1282 Computer equipment related to Production and Operations (P&O) environment - All servers, storage, printers, etc. (includes all related parts and peripherals)

Description:Acquisition of all computer servers (including mainframes) and related components/peripherals associated with the Production and Operations (P&O) or Data Center Environment. This includes central processing unit, peripherals, printers, data entry, data capture or storage devices. Includes all related parts and/or components. Notes: 1. Acquisition of DCE related workstations, etc., and associated components are to be included under object code 1283. License/maintenance fees of server related computer software are to be included under object code 0584.

1283 Computer equipment related to Distributed Computing Environment (DCE) - Desktop/personal/portable (includes all related parts and peripherals)

Description:Acquisition of all computer equipment and associated components related to the Distributed Computing Environment (DCE), including the acquisition of desktops, personal computers, mobile/portable workstations, hand-held computing devices and special function or high-end workstations, as well as acquisition of all related parts and peripherals Notes: 1. Acquisition of servers (in Production and Operations or Data Centers) and server related components are to be included under object code 1282; 2. Acquisition of DCE related computer software is to be included under object code 1284.

1284 Client software related to Distributed Computing Environment (DCE)

Description:Acquisition of client software related to the Distributed Computing Environment (DCE). Client software includes client operating system software and utilities, desktop and office productivity software, collaboration software, email software and DCE related security software. Also includes initial acquisition costs (e.g. licensing fees) as well as one-time fees relating to additional functionality or new releases of software. Excludes annual maintenance fees. Notes: 1. Annual maintenance fees are to be classified under object code 0582.

1285 Application software (including COTS) and application development and delivery software

Description:Acquisition of Application/Database Development and Maintenance (ADDM) Software. ADDM software includes Information Management software, Business Applications that support programs, corporate and administrative systems software, Business Intelligence software, database management systems software and utilities, application development software, tools and utilities and integration software and ADDM related security software. Also includes initial acquisition costs (e.g. licensing fees) as well as one-time fees relating to additional functionality or new releases of software. Excludes annual maintenance fees. Notes: 1. Annual maintenance fees are to be classified under object code 0583.

1286 Operating system and utility software related to servers, storage, peripherals and components

Description:Acquisition of server operating system and utility software. Server operating system software and utilities include operating systems and associated utilities for all servers, including mainframes, as well as system management software and server environment related security software. Includes initial acquisition costs (e.g. licensing fees) as well as one-time fees relating to additional functionality or new releases of software. Excludes annual maintenance fees. Notes: 1. Annual maintenance fees are to be classified under object code 0584.

1287 Networking software

Description:Acquisition of networking software. Networking software includes all software that supports data networking, voice networking, image and video communications, call centre infrastructure as well as inter and intra network software and network related security software. Also includes initial acquisition costs (e.g. licensing fees) as well as one-time fees relating to additional functionality or new releases of software. Excludes annual maintenance fees. Notes: 1. Annual maintenance fees are to be classified under object code 0585.

1289 Communications/Networking equipment (includes analog, digital and combined analog/digital equipment, cabling, parts and peripherals)

Description:Acquisition of communications/networking equipment and systems (includes analog, digital, combined analog and digital equipment, cabling, parts and peripherals). It excludes equipment provided as a component of a service supplied by telecommunications service providers, including common carriers. Notes: 1. Equipment provided by telecommunications service providers as part of a service is to be classified under object code 0230 or 0231, as applicable.

1291 Image/Video communications software (includes telepresence/video conferencing software)

Description:Acquisition of image/video communications software (including telepresence/video conferencing software), as well as any related royalties that require periodic payments in order to continue their use. Image/Video Communications Software also includes all software that supports optical character recognition associated with communications systems, television, and other video communications, facsimile, facsimile-image transfer and related security software. Includes initial acquisition costs (e.g. licensing fees) as well as one-time fees relating to additional functionality or new releases of software. Excludes annual maintenance fees. Notes: 1. Annual maintenance fees are to be classified under object code 0590.
