

Discover how we serve Canadians

#100Wellington We've held public consultations on the future of the 100 Wellington building in Ottawa.

Canadians from coast to coast to coast have submitted their opinions and ideas via the online survey.

We received over **7000** responses!

HAVE YOUR SAY
ON THE FUTURE OF 100 WELLINGTON

When we innovate in serving our clients, we are helping them better serve Canadians.

LEANing our processes helps us improve the way we do business.

- ✓ We engage in bidirectional processes.
- ✓ Offering cross-hill training to key employees.
- ✓ Offering an appointment with the Community of Practice to discuss needs, discuss and provide support to the individual staff.

Language Comprehension for 30 documents a computer can translate in 30 seconds.

Phrase Interpretation for a computer and a total of 29 times to edit!

Build in Canada Innovation Program

Through our Build in Canada Innovation Program, the Government of Canada can test Canadians' innovators in a real-world environment!

The Canada Gazette turned 175!

The Canada Gazette is the official newspaper of the government, publishing new Acts of Parliament.

Not only can a great deal of Canada's history be found in the proclamations published in the Gazette, but it has served the important role of connecting Canadians to their government!

It's older than the Confederation!

We are collaborating with the science and technology departments to develop an approach to investment in science and infrastructure.

We continue to rehabilitate our Parliament Buildings to preserve them for future generations of Canadians to enjoy.

<http://www.parliament.gc.ca>

We also work with other departments to repurpose space to address homelessness and support refugee housing.

We assisted in the resettlement of Syrian refugees by arranging for military, charter and commercial flights.

We collaborate with communities and first nations to deliver major environmental innovation projects such as Rock Bay and Esquimaut Harbour.

We implemented our frontline staff's ideas to streamline the security screening process. The result? We've met our performance standards and are increasing efficiency for industry and the GC!

And more!
