Welcome to CCOHS' Catalogue 2013!

This reference tool outlines how CCOHS delivers workplaces the tools and knowledge that can assist you in making informed decisions about health and safety in your workplace.

Our goal is to support all workplaces by delivering current information and good practices that will enhance health and safety.

Workplace participants need to consider a holistic, comprehensive approach to workplace health and safety by using education, training and reliable workplace products and services. By paying attention to these interrelated elements and how they work together will help a progressive injury and disease prevention culture evolve plus, create the collaborative environment for workplace health and safety to thrive.

Join us and let us help you create workplaces that are healthy, safe and well.

Steve Horvath
President and Chief Executive Officer
Canadian Centre for Occupational Health
and Safety (CCOHS)

What Are QR Codes?

A Quick Response (QR) Code is a barcode that helps you find encoded information for a website or resource in two-dimensional space for example, this catalogue.

How to use QR Codes

You can scan the QR Codes using a reader that can be downloaded for free from the App store of your choosing. Download and launch the appropriate app and point your phone's camera at the QR code that you want to scan. You are then taken over to the actual web page or electronic resource on your smart device.

This specific QR Code takes you to the Stay Connected with CCOHS URL--www.ccohs.ca/ccohs/connectwithccohs.html where you can fill out a form so we know whom you are and understand what need from us. We look forward to hearing from you soon!

OH&S Programs and Management Systems

www.ccohs.ca/keytopics/oshprograms

A requirement under occupational health and safety (OH&S) legislation in most Canadian jurisdictions, a health and safety program is a plan of action designed to prevent accidents and occupational diseases. Find resources on OH&S programs and management systems to help you manage legal requirements and ensure compliance.

OSH Works™ Health and Safety Compliance Version

A health and safety program is a definite plan of action designed to prevent injuries and illness at work. In Canada, employers are legally required to implement and maintain an effective workplace health and safety program. The Health and Safety Compliance version of OSH Works can help you establish and maintain your health and safety program, so you can reduce injuries and illnesses, ensure compliance and ultimately, help keep your employees healthy and safe.

OSH Works™ Manitoba Version

Meet and exceed the regulatory compliance requirements set by the Manitoba Workplace Safety and Health Act. OSH Works - Manitoba was developed in cooperation with the Workplace Safety and Health Division of the Manitoba Labour and Immigration Department. Built specifically for Manitoba-based organizations, this version of OSH Works contains the information resources and guidance materials needed for each of the 11 Core Elements of a Workplace Safety and Health Program, ensuring successful implementation.

Legislation and Regulatory Compliance

www.ccohs.ca/keytopics/legislation

Learn about your legal rights and responsibilities and stay in compliance with assistance from our wide range of health, safety, environment, legislation products and services.

Legislation Services

Canadian enviroOSH Legislation Plus Standards – www.ccohs.ca/products/legislation/legislation.html

Featuring the full text of Canadian health, safety and environmental legislation in one convenient location, CCOHS will help you determine your responsibilities under the law. Search across all Canadian jurisdictions—access critical guidelines, codes and practice and referenced standards from the Canadian Standards Association (CSA) and the Canadian General Standards Board (CGSB) plus the British Columbia Workers Compensation Board Standards (WCB of BC).

Canadian Employment Legislation

Access this comprehensive, easy-to-search compilation of the full text of Canadian employment standards, labour relations, workers' compensation, pay equity, human rights and privacy legislation. This database also includes supplementary documentation and guides issued by the relevant ministries to help you interpret and apply the legislation.

National Labour Operations Resources (NLOR) – www.ccohs.ca/products/hrsdcl/

An essential tool to help organizations stay compliant with the Canada Labour Code and related legislation - a must for Canadian federally regulated industries. Bundled with CCOHS' Canadian enviroOSH Legislation or on its own, the National Labour Operations Resources (NLOR) service can help satisfy your requirements for reliable and easily accessible legislative information to help you stay compliant.

Workplace Hazards

www.ccohs.ca/keytopics/wplace_hazards

Many types of workplace hazards exist—ergonomic, chemical, mental health and well being and environmental—which can cause harm or adverse effects for working people. CCOHS can help with the following resources designed with specific hazards and their controls in mind.

Reference Services

OSH References – www.ccohs.ca/products/oshreferences/

Authoritative, international OSH literature coverage. The OSH References Collection of bibliographic databases provides convenient access to international sources of health, safety and environmentally-related information. Databases in the collection include: OSHLINE®, NIOSHTIC®, NIOSHTIC-2, HSELINE, CISILO, Canadiana, PubMed.

ILO Encyclopaedia of Occupational Health and Safety – www.ccohs.ca/products/iloencyc/

Produced by the United Nations' International Labour Organisation (ILO), this comprehensive resource was developed in consultation with more than 1,000 health and safety experts, including contributions from the American Industrial Hygiene Association (AIHA), the Canadian Centre for Occupational Health and Safety (CCOHS), the International Commission on Occupational Health (ICOH), the National Fire Protection Association (NFPA), the National Institute for Occupational Safety and Health (NIOSH), and the Occupational Safety & Health Administration (OSHA). The CISILO database is included and offers over 50,000 additional references to occupational health and safety literature from around the world.

Attention Academic Institutions – www.ccohs.ca/products/asp/

CCOHS has a collection of health and safety databases specifically designed for colleges, universities and other degree-granting institutions. Contact CCOHS for more information at 1-800-668-4284 or email clientservices@ccohs.ca

CCOHS Membership Program

The Canadian Centre for Occupational Health and Safety (CCOHS) has a mission: to make sure every Canadian worker comes home safely every day.

With your support, we can fulfill our mission by serving Canadians with credible, practical tools and resources to improve health and safety programs and activities. Your business allows us to continue working towards this goal and we appreciate your partnership. We are proud to offer Canadians the most accurate and up-to-date health and safety information.

It is important to us that you have access to the health and safety knowledge and tools you require for your organization. CCOHS' Annual Membership Program can help you advance your organization's health and safety program through close affiliation and collaboration with CCOHS and its extensive network and wealth of resources.

CCOHS Members will receive the following exclusive benefits:

- Special rates and discounts on products and services
- Tools and resources to promote workplace health and safety within your organization
- Credits toward CCOHS publications
- Membership Matters, an exclusive member's only quarterly newsletter
- Special rates at CCOHS' Forum
- Access to CCOHS health and safety newsletters

CCOHS – a trusted source

The Canadian Centre for Occupational Health and Safety (CCOHS), a Canadian federal government agency based in Hamilton, Ontario is Canada’s national resource for the advancement of workplace health and safety.

CCOHS promotes the total well-being - physical, psychosocial and mental health - of working Canadians by providing information, training, education, management systems and solutions that support health and safety programs and the prevention of injury and illness. CCOHS partners and collaborates with agencies and organizations from Canada and around the world to improve the quality and quantity of resources and programs, as well as expand the breadth of usage of occupational health information to many different segments of society.
