I, the undersigned official full-time salaried veterinary officer of the Government of Canada, hereby certify that following due enquiry and to the best of my knowledge and belief, the poultry/hatching eggs identified below comply with the following requirements:

1. The day old birds/hatching eggs originate from a province in Canada recognized to be free of avian influenza, subtypes H5 or H7 within a radius of 25 km for at least three months.
2. The flock of origin participates in the required program under the legislative authority of the Health of Animals Act and is registered in a provincial health program.
3. The flock from which the shipment originated has been subjected to regular inspection by an official veterinarian of the Canadian Food Inspection Agency and found to be free of evidence of infectious or contagious diseases, and, so far as can be determined, has not been exposed to such diseases.
4. The flock of origin has been confirmed free from mycoplasma (*M. gallisepticum*, *M. synoviae*, *M. iowa* and *M. meleagridis*), *Salmonella pullorum*, *Salmonella gallinarum*, intestinal salmonella (*S. typhimurium* and *S. arizona*) as a result of sampling performed under a recognized flock monitoring program.
5. The flock(s) and the hatchery(ies) from which the shipment originated were inspected within the past thirty (30) days and were found to be free from evidence of fowl typhoid, pullorum disease, egg drop syndrome, fowl pox, fowl cholera, infectious coryza, infectious laryngotracheitis, viral arthritis, psittacosis (ornithosis), avian tuberculosis, avian encephalomyelitis, velogenic Newcastle disease, reticuloendotheliosis, mycoplasmosis (chronic respiratory disease), infectious bronchitis, leucosis including Marek's disease, avian monocytosis, infectious bursal disease (gumboro disease), inclusion body hepatitis, trichomoniasis, histomoniasis, listeriosis, Arizonosis, coccidiosis, colibacillosis, espiroquetosis, erysipelthrix, spirochetosis, and chigger disease.
6. The flock(s) and the hatchery(ies) from which the shipment originated were inspected within the past thirty (30) days and were found to be free from evidence of the following diseases of turkeys: coronaviral enteritis of turkeys, hemorrhagic enteritis virus disease of turkeys, PMV3-turkey, runting/stunting syndrome, *Salmonella meningoencephalitis*, turkey viral hepatitis and turkey viral rhinotracheitis.
7. All cages, crates, vehicles and areas in the aircraft used for transportation of the chicks/poults/hatching eggs were cleaned and disinfected in a manner approved by the Canadian Food Inspection Agency.
8.
  - i) In the case of day old birds, they have been clinically examined by a qualified poultry inspector prior to departure and found to be in good health without anomalies.
  - ii) In the case of hatching eggs, they were properly disinfected immediately after collection.

9. In the event that flock vaccination is practiced against specified poultry diseases, the following information is provided:

Date of Vaccination \_\_\_\_\_

Dose \_\_\_\_\_

Type of Vaccine \_\_\_\_\_

Manufacturer \_\_\_\_\_

10. Identification of Birds/Hatching Eggs

i) Number shipped \_\_\_\_\_

ii) Breed \_\_\_\_\_

iii) Strain or Kind of Poultry or Hatching Eggs \_\_\_\_\_

iv) Name of Establishment of Origin \_\_\_\_\_

v) Location \_\_\_\_\_
