

**VETERINARY HEALTH CERTIFICATE
FOR THE EXPORT OF LLAMAS AND ALPACAS TO ISRAEL**

EXPORTER: _____

ADDRESS: _____

IMPORTER: _____

ADDRESS: _____

MEANS OF TRANSPORT: _____

NUMBER OF ANIMALS CERTIFIED FOR EXPORT: _____

I, the undersigned official government veterinarian, hereby certify that, following due enquiry and to the best of my knowledge and belief, the animals identified below comply with the following statements:

1. The llamas and/or alpacas described below were born and reared in Canada.
2. During the recent 6 months prior to shipment of said animals:
 - a) no cases of Foot and Mouth Disease (F.M.D.) have occurred in radius of 30 km, and
 - b) no other diseases included in former list "A" of the O.I.E. code have occurred in a radius of 30 km of the place of origin of said animals.
3. During the 12 months preceding the animals' qualification for export, there has been no evidence of tuberculosis (*Mycobacterium bovis*), epizootic haemorrhagic disease (EHD) virus, brucellosis (*B. abortus*, *B. melitensis*, and *B. ovis*), leptospirosis, paratuberculosis (Johne's disease), bovine genital campylobacteriosis (vibriosis), or trichomonosis found in these animals, or other animals associated with these animals for export.
4. The premises of origin of the animals for export were free of bovine tuberculosis for at least 2 years prior to export.
5. During the previous 5 years, there have been no reports of paratuberculosis in the animals destined for export.
6. Prior to entry into the pre-export quarantine (PEQ) facility, all animals for export were individually identified with tamper-proof identification.
7. The animals for export were placed into PEQ, for a period of at least 21 days immediately prior to the export. During this pre-embarkation period the animals have been under supervision of an official CFIA veterinarian.
First day of PEQ: _____.
8. While in PEQ, the animals for export have remained clinically free from evidence of infectious diseases.
9. Within the first 15 days of the PEQ period, the animals were tested for tuberculosis, on _____ (date), with negative results, using the intradermal tuberculin test. There has been at least 60 days between this test and any previous intradermal tuberculin test.
10. While in PEQ each animal for export was tested, on _____ (date), for *B. abortus* and *B. melitensis*, using the BPAT, CFT or ELISA *, and for *B. ovis* using the CFT, all with negative results.
11. The animals were tested for bovine pestivirus (BVD) on _____ (date), with negative results on immunoperoxidase test (IP) using blood or serum.
12. The animals were subjected to serological ELISA or AGID test *, on _____ (date) for the detection of bluetongue (BT) and epizootic haemorrhagic disease (EHD) antibodies, with negative results. The animals remained in a BT and EHD virus free zone until export.
13. In case of a female, it is not pregnant.
14. At no time during the PEQ was there any contact with livestock that were not quarantined to at least the same standards.

15. The animals were treated three times, during the quarantine period, with a 14 day interval between each treatment, against internal and external parasites, with ivermectin or other comparable preparations.

Name of product: _____ Dose rate: _____

Dates of treatment: _____, _____, _____

16. Within 10 days prior to the scheduled date of export, the animals were examined for external parasites and treated for ectoparasites with a registered parasiticide.

Name of product: _____ Active ingredient(s): _____

Concentration: _____ Dose of application: _____

Date of treatment: _____

17. Within 48 hours of the scheduled time of export, each animal was examined by an official CFIA veterinarian and found to be free of signs of contagious and infectious diseases, free of external parasites, and fit to travel.

18. The animals for export were loaded onto vehicles cleaned with a disinfectant, and transported directly to the port of departure. During transit from the PEQ facility to the port of departure and loading, the animals will not be in contact with any animals or equipment used with animals of a lesser health status (based on an official declaration of the transporter).
