RF _____

LH _____

RH _____

Body _____

ACQUIRED MARKS (Scars, tattoos, freezemarking etc.)

INSTRUCTIONS:

Please ensure that the diagram and written description agree.
White markings to be show in red.
Whorls to be marked as (x).
Scars to be marked and indicated with an arrow (->).
If no markings, mark this as (0).

SECTION II - ORIGIN AND DESTINATION OF ANIMALS

The horse is to be sent from _____ to Norway
(place of export)

by train/truck/plane/boat _____

Indicate the mode of transport and name or flight number, whichever is the case.

Name of Consignor: _____

Address: _____

Name of Consignee: _____

Address: _____

SECTION III

I, the undersigned, certify that the animal described above meets the following requirements:

- a) It originates from a country where the following diseases are compulsorily notifiable: African horse sickness, dourine, glanders, equine encephalomyelitis (all forms including VEE), infectious anaemia, vesicular stomatitis, rabies and anthrax.
- b) It has been examined today and shows no clinical signs of disease⁽²⁾.
- c) It is not intended for slaughter under a national programme of infectious or contagious disease eradication.
- d) During the last forty (40) days preceding the exportation, it has been resident on holdings under veterinary supervision in
 - Canada, and/or
 - member states of the Community, and/or
 - Australia, Bulgaria, Belarus, Switzerland, Cyprus, Czech Republic, Estonia, Greenland, Hong Kong, Croatia, Hungary, Iceland, Japan, Lithuania, Latvia, Former Yugoslav Republic of Macedonia, Macau, Malaysia (peninsula), Norway, New Zealand, Poland, Romania, Russia⁽¹⁾, Singapore, Slovenia, Slovak Republic, Ukraine, United States of America.

If it has been moved to the country of dispatch from a country listed in the third indent, it was imported with at least the same animal health requirements as if the horse was imported directly into the European Community.

- e) It does not come from the territory or in the cases of official regionalization according to the EEC legislation from a part of the territory of a third country in which:
 - i) Venezuelan equine encephalomyelitis has occurred during the last two (2) years;
 - ii) dourine has occurred during the last six (6) months;
 - iii) glanders has occurred during the last six (6) months;
 - iv) vesicular stomatitis has occurred during the last six (6) months⁽³⁾;
or
the animal was tested by a virus neutralization test for vesicular stomatitis on _____⁽⁵⁾ this being within ten (10) days of export, with negative result at 1 in 12⁽³⁾⁽⁴⁾;
 - v) in the case of an uncastrated male older than one hundred and eighty (180) days,
either equine viral arteritis has not been officially recorded during the last six (6) months⁽³⁾,
or
- the animal was tested⁽⁴⁾ on a blood sample taken within twenty-one (21) days of export

on _____⁽⁵⁾ by virus neutralization test for equine viral arteritis with a negative result at a dilution of 1 in 4,

or

- an aliquot of its entire semen taken within twenty-one (21) days of export

on _____⁽⁵⁾ was tested by virus isolation test for equine viral arteritis with negative results⁽³⁾⁽⁴⁾

or

- the animal was vaccinated on _____⁽⁵⁾ against equine viral arteritis under official veterinary supervision with a vaccine approved by the competent authority, according to the following programme for initial vaccination and has been re-vaccinated at regular intervals⁽³⁾⁽⁴⁾:

Programme for initial vaccination against equine viral arteritis

Instruction: Cross out vaccination programmes that do not apply to the animal described above.

a) vaccination was carried out on the day a blood sample was taken that subsequently proved negative in a virus neutralization test at a dilution of 1 in 4;

or

b) vaccination was carried out during a period of isolation of not more than fifteen (15) days under official veterinary supervision, commencing on the day a blood sample was taken that was tested during that time with negative results in a virus neutralization test at a dilution of 1 in 4;

or

c) vaccination was carried out when the animal was at an age of one hundred and eighty (180) to two hundred and seventy (270) days, during a period of isolation under official veterinary supervision. During the isolation period, two (2) blood samples taken at least ten (10) days apart proved a stable or declining antibody titre in a virus neutralization test for equine viral arteritis.

f) It does not come from the territory or from a part of the territory of a third country considered, in accordance with EEC legislation, as infected with African horse sickness.

- It was not vaccinated against African horse sickness⁽³⁾.

- It was vaccinated against African horse sickness on _____⁽³⁾⁽⁴⁾⁽⁵⁾

g) It does not come from a holding which was subject to prohibition for animal health reasons nor had contact with equidae from a holding which was subject to prohibition for animal health reasons:

i) during six (6) months in the case of equine encephalomyelitis, beginning on the date on which the equidae suffering from the disease are slaughtered;

ii) in the case of infectious anaemia, until the date on which, the infected animals having been slaughtered, the remaining animals have shown a negative reaction to two (2) Coggins tests carried out three (3) months apart;

iii) during six (6) months in the case of vesicular stomatitis;

iv) during one (1) month from the last case, in the case of rabies;

v) during fifteen (15) days from the last recorded case, in the case of anthrax.

or if all of the animals of species susceptible to the disease located on the holding have been slaughtered and the premises disinfected, the period of prohibition shall be thirty (30) days, beginning on the day on which the animals were destroyed and the premises disinfected, except in the case of anthrax, where the period of prohibition is fifteen (15) days.

h) To the best of my knowledge, it has not been in contact with equidae suffering from an infectious or contagious disease in the fifteen (15) days prior to this declaration.

l) It was subjected to a Coggins test for infectious anaemia on _____⁽⁵⁾, this being within three (3) months of export, with negative results⁽⁴⁾.

- j) It was not vaccinated for Venezuelan equine encephalomyelitis during the last six (6) months⁽⁴⁾.
- k) **Either** it was vaccinated against Western and Eastern encephalomyelitis with inactivated vaccine on _____⁽⁵⁾ or Japanese B-encephalitis on _____⁽⁵⁾, this being within six (6) months and at least thirty (30) days of export ⁽⁴⁾.

or

it was subjected to haemagglutination inhibition tests to Western and Eastern encephalomyelitis on two (2) occasions with an interval of twenty-one (21) days, the second of which must have been carried out during ten (10) days prior to dispatch on _____⁽⁵⁾ and on _____⁽⁵⁾, with either negative reactions, if it has not been vaccinated⁽⁴⁾, or without an increase in the antibody count, if it has been vaccinated more than six (6) months ago⁽⁴⁾⁽⁶⁾

- l) it was not vaccinated against West Nile Virus ⁽³⁾,

or

it was vaccinated against West Nile Virus with an inactivated vaccine on at least two occasions at an interval of between 21 to 42 days, the last vaccination being carried out not later than 30 days prior to dispatch on ⁽³⁾⁽⁴⁾⁽⁵⁾

(Date) _____

SECTION IV

I have a written declaration signed by the owner or the representative⁽³⁾ stating that:

- the horse will be sent directly from the premises of dispatch to the premises of destination without coming into contact with other equine animals not accompanied by such a certificate, in a vehicle cleansed and disinfected in advance with a disinfectant officially recognized in the country of dispatch.
- the conditions of point III(d) are fulfilled.

DECLARATION

I, the undersigned, _____ declare:
(Owner or representative⁽⁴⁾ of the horse described above)

- 1) The horse will be resident inside the European Community or Norway for a period not longer than ninety (90) days.
- 2) I agree with the statement in Section IV.
- 3) The animal has either remained in Canada since birth or entered Canada on _____⁽³⁾⁽⁵⁾.

Place and Date

Owner's Signature

SECTION V

The certificate is valid for ten (10) days. In the case of transport by ship, the time is prolonged by the time of the voyage.

Date/

Official Export Stamp/

SECTION VII - DATE AND PLACE OF ENTRY INTO THE TERRITORY OF THE COMMUNITY

Stamp and signature of the official veterinarian

Date of Export _____

SECTION VIII

Where the horse subsequently moves from the Member State referred to in Section II to another Member State or Norway, the term of the certificate must be extended for a further ten (10) days by an official veterinarian of the Member State of dispatch. The total period of residence on the territory of the Community must not be more than ninety (90) days.

I, the undersigned, have examined the horse today and certify that it meets the conditions of Directive 90/426/EEC and in particular, the requirements of point III(b), (c), (g) and (h) of this certificate.

DATE OF EXAMINATION	PLACE OF EXAMINATION	PLACE OF DESTINATION	STAMP AND SIGNATURE OF THE OFFICIAL VETERINARIAN

NAME IN BLOCK CAPITALS AND CAPACITY

- (1) Or part of territory in accordance with Article 13(2) of Directive 90/426/EEC.
- (2) The certificate must be issued on the day of loading of the animal for dispatch to the Member State of destination or Norway or on the last working day before embarkation and accompanied by the identification (passport) during the time of residence in the Community.
- (3) Delete as appropriate.
- (4) The test(s) carried out, their results and the vaccination have to be entered in the identification document (passport).
- (5) Insert date.
- (6) WEE and EEE vaccination or testing requirements apply only to Canada and the United States of America. Japanese B-encephalitis vaccination applies to Hong Kong and Japan, Macau, Malaysia (peninsula), Singapore.
