

**VETERINARY HEALTH CERTIFICATE
EXPORT OF PIGS TO THE REPUBLIC OF THE PHILIPPINES**

EXPORTER: _____

ADDRESS: _____

IMPORTER: _____

ADDRESS: _____

A. Health Conditions

I, the undersigned Veterinary Officer, duly authorized by the Government of Canada, hereby certify that:

1. Canada is free of foot-and-mouth disease, African swine fever, hog cholera, vesicular stomatitis, swine vesicular disease, Teschen disease, Aujeszky's disease and *Brucella suis*.
2. The pigs identified in Section C come from a farm where there have been no outbreaks of the following diseases for the last twelve (12) months and individual animals for export examined in quarantine are free from clinical evidence of such diseases: brucellosis, leptospirosis, porcine reproductive and respiratory syndrome (PRRS), erysipelas, atrophic rhinitis, transmissible gastroenteritis (TGE), postweaning multisystemic wasting syndrome (PMWS) and swine (vibronic) dysentery.
3. The animals for export were isolated from all other animals for a minimum of thirty (30) days prior to export and not exposed to any of the above mentioned diseases during that period.
4. The animals for export are for breeding purposes and free from physical defects and deformities that could affect their breeding potential.
5. The animals for export were examined prior to shipment and found to be free from any evidence of infectious or contagious diseases.
6. The animals for export were not fed garbage at any time.
7. No animals, other than those tested for export to the Philippines were permitted to board the ship or aircraft at the time of embarkation.

B. Testing Requirements

Within thirty (30) days prior to export, the animals were tested and found negative for the following diseases:

1. Leptospirosis: MAT for the serotypes *L. pomona*, *L. canicola*, *L. icterohemorrhagiae*, and *L. tarasovi*.

Or

The animals were treated twice for leptospirosis at a fourteen (14) day interval with dihydrostreptomycin at a rate of 25 mg/kg body weight, or another antibiotic known to be effective against leptospirosis, at the manufactures recommended dosage.

Date of treatment: _____

Antibiotic used: _____

Dosage/kg of body weight: _____

2. Transmissible gastroenteritis: ELISA test

EXPORTER DECLARATION

1. During the transit no animals from any other country will be permitted onboard the vessel or aircraft that is transiting the swine for export that have been listed in section C of the veterinary health certificate.
2. No fodder, feed or straw shall be taken onboard from any intermediate port during the time the swine for export are onboard the vessel or aircraft.
