

VETERINARY HEALTH CERTIFICATE FOR EXPORT OF BOVINE SEMEN TO INDIA

Exporting country: CANADA

Competent Authority: CANADIAN FOOD INSPECTION AGENCY
GOVERNMENT OF CANADA

Area and District: _____

SECTION I. ORIGIN OF THE SEMEN

Name of producer (centre or exporting unit): _____

Postal address: _____

Name of consigner (if different than above): _____

Postal address: _____

Identification of semen shipment container: _____

Official seal placed on the semen shipment container: _____

The semen producer is to provide information to the effect that the donor bulls are free of any known genetic disorders, that is Bovine Leukocyte Adhesion Deficiency (BLAD) syndrome, Citrullinemia, Deficiency of Uridine Monophosphate Synthase (DUMPS) and Factor XI Deficiency syndrome.

SECTION II. DESTINATION OF THE SEMEN

Name of consignee: _____

Postal address: _____

Means of transport: _____

SECTION III. SANITARY INFORMATION

I, the undersigned Official Veterinarian, certifies that:

1. Canada is free from foot and mouth disease (types C, SAT 1,2,3), rinderpest, contagious bovine pleuropneumonia, lumpy skin disease and Rift Valley fever. No case of vesicular stomatitis occurred within 180 kilometers of the semen collection centre during the period extending from 30 days before the first collection of semen until 30 days after the last collection of semen.
2. The donor bulls were born and continuously residing in Canada.
3. The donor bulls showed no sign of disease on the day of collection.
4. The donor bull has been inspected and found to have no sign of any of the diseases mentioned in section 6 below within the 30 days after semen collection.
5. The semen production centre is approved by the Canadian Food Inspection Agency (CFIA).
6. The donor bulls were kept in the semen collection centre which was officially free of brucellosis and tuberculosis, and clinically free of bovine genital campylobacteriosis, Johne's disease, bluetongue, enzootic bovine leukosis, bovine viral diarrhea, infectious bovine rhinotracheitis, trichomoniasis, foot and mouth disease (types O, A and Asia-1) and leptospirosis during the two years prior to the semen collection.
7. The donor bulls have been tested annually, unless otherwise specified, in CFIA laboratories with negative results against the diseases listed below:
 - 7.1. Tuberculosis: intradermal tuberculin test;
 - 7.2. Brucellosis: CF or ELISA test;
 - 7.3. Bluetongue: ELISA test,
 - a) at least every 60 days throughout the semen collection period (not required for a bluetongue free country), and
 - b) between 21 and 60 days following final semen collection;

- 7.4. Trichomoniasis: culture of preputial washing with microscope examination of culture;
- 7.5. Johne's disease: ELISA test;
- 7.6. Bovine genital campylobacteriosis: culture of preputial washing with microscope examination of culture;
- 7.7. Infectious bovine rhinotracheitis:
 - 7.7.1. the donor bull is negative to a SN or an ELISA test,
or
 - 7.7.2. a semen virus isolation test was done on each collection date;
- 7.8. Enzootic bovine leukosis: AGID or ELISA test;
- 7.9. Bovine viral diarrhea (BVD):
 - 7.9.1 the donor bull is negative to a SN test,
or
 - 7.9.2 for BVD serologically positive animals, a semen virus isolation test was done on each collection date.
8. The semen has been collected, handled or processed in accordance with the appropriate sections of the Terrestrial Animal Health Code of OIE concerning collection and processing of bovine semen.
9. The semen is being transported in containers that are either new or cleaned and disinfected in a manner acceptable to CFIA official veterinarian. The semen is not known to contain pathogenic organisms.
10. At the time of semen collection, the donor bulls have passed all pre-isolation and isolation tests needed for entry into the resident herd at the semen collection centre and had not been used for natural mating since initiation of these tests.
11. Prior to export, the transportation container was sealed under veterinary supervision using an official seal as mentioned in Section I.
