

**DEFECTS LOG: PRESENTATION STANDARDS FOR MPIP
PROCESS EVALUATION AND CORRECTIVE MEASURE(S) EVALUATION**

<input type="checkbox"/> Chicken		<input type="checkbox"/> Fowl		<input type="checkbox"/> Turkey		<input type="checkbox"/> Quail		Year				Month											
Establishment:				Shift: <input type="checkbox"/> Day <input type="checkbox"/> Evening <input type="checkbox"/> Night				Line No: <input type="checkbox"/> 1 <input type="checkbox"/> 2															
Date:																							
Time:																							
Monitor:																							
Sample Size:																							
Evaluation Type* (P ^r or P ^l or C):																							
Line Speed:																							
PRESENTATION DEFECTS				1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
Viscera Missing: Chicken/Turkey: Heart and liver Fowl: Heart and liver and duodenum																							
Visceral Parts Missing: Chicken/Turkey/Quail: Heart and liver Fowl: Heart or liver or duodenum (Multiply fowl hearts x 0.1)																							
Inadequate Abdominal Opening: Chicken/Light Fowl > 2 cm Turkey/Heavy Fowl/Roaster > 3 cm Quail > 1,5 cm (minimum 2,8 cm diameter)																							
Sample Total																							
Ac = (3³², 5⁵⁰) ; Re = (4³², 6⁵⁰)																							
Corrective Measure(s) **																							
Comments																							
* Evaluation Type - P^r = Process evaluation at regular frequency, P^l = Process evaluation at lower frequency, C = Corrective Measure(s) Evaluation												** Corrective Measure(s) Codes CP = change presenter; AD = add presenter; VW = verbal warning; SR = line speed reduction; E = Equipment adjustment; O = other (specify).											
NOTE: If the total of missing viscera reaches half of the rejection number, the VIC shall determine if the defects are significant considering the pathology associated with the specific flock; or ther has been 3 consecutive corrective actions without regaining presentation control.
