EXPORT OF DAY OLD POULTRY/HATCHING EGGS TO TAIWAN**

**Certificate for Day Old Poultry**

**Certificate for Hatching Eggs**

**Exporter:** \_\_\_\_\_

**Address:** \_\_\_\_\_

**Importer:** \_\_\_\_\_

**Address:** \_\_\_\_\_

I, the undersigned Official Veterinarian, duly authorized by the Government of Canada, hereby certify that, after due enquiry and to the best of my knowledge and belief, the day old poultry/hatching eggs described below meet the following requirements:

1. The day old land fowls/hatching eggs originate from a province in Canada, officially recognized to be free of Highly Pathogenic Avian Influenza.
2. Canada is officially recognized to be free from fowl typhoid and pullorum disease.
3. The flock of origin participates in the required programs under the legislative authority of the Health of Animals Act.
4. The flock from which the shipment originated has been subject to regular inspection by an Official Veterinarian of the Canadian Food Inspection Agency, and found to be free of evidence of infectious or contagious diseases, and, so far as can be determined, has not been exposed to such diseases. The hygiene and disease security procedures in breeding flocks and hatcheries shall be in compliance with Chapter 6.4 of the Terrestrial Animal Health Code of the World Organization for Animal Health (OIE).
5. The day old land fowls/hatching eggs shall originate from breeding flocks whose birds have been in the exporting country for the past 6 months or since hatching and have not been in contact with any imported poultry or birds.
6. The day old land fowls/hatching eggs shall originate from breeding flocks in which Newcastle disease, infectious bursal disease, pullorum disease, infectious laryngotracheitis and fowl cholera have not occurred in the last 12 months; and avian influenza (H5 and H7 subtypes), psittacosis, avian encephalomyelitis, egg drop syndrome, infectious bronchitis, chronic respiratory disease (*Mycoplasma gallisepticum*), infectious synovitis (*Mycoplasma synoviae*) and infectious coryza have not occurred for the past 6 months.
7. The breeding flocks from which the day old land fowls/hatching eggs originate shall not be vaccinated with vaccines against avian influenza.
8. The breeding flocks from which the day old land fowls/hatching eggs originate shall be subjected regularly to the following disease tests done by a laboratory designated by the exporting country with negative results:
  - i. Avian influenza (H5/H7): ELISA and PCR
  - ii. Newcastle Disease: virus isolation
  - iii. Pullorum Disease: Tube Agglutination Test

The tests methods shall follow the Manual of Diagnostic Tests and Vaccines for Terrestrial Animals for the OIE

9. The hatching eggs were disinfected in accordance with the methods designated in Chapter 6.4 of the Terrestrial Animal Health Code of the OIE.
10. All cages, crates, vehicles and areas in the aircraft used for transportation of the poultry/hatching eggs were cleaned and disinfected in a manner approved by CFIA.
11. In the event that flock vaccination is practised against specified poultry diseases, the following information is provided:
  - a) Date of vaccination: \_\_\_\_\_
  - Dose: \_\_\_\_\_
  - Type of vaccine: \_\_\_\_\_
  - Manufacturer: \_\_\_\_\_

12. Identification of Poultry or Hatching Eggs:

- i) Number shipped: \_\_\_\_\_
- ii) Breed: \_\_\_\_\_
- iii) Strain or Kind of Poultry or Hatching Eggs: \_\_\_\_\_
- iv) Name of Establishment of Origin/Hatchery of Origin: \_\_\_\_\_
- v) Address of Establishment of Origin/Hatchery of Origin \_\_\_\_\_
- vi) Registration Number of Hatchery of Origin and Breeding Establishment of Origin \_\_\_\_\_
