I, the undersigned Official Veterinarian, duly authorized by the Government of Canada, hereby certify that:

1. Canada has never had an occurrence of, or has been free, with no practice of vaccination since eradication, from foot-and-mouth disease, rinderpest, and contagious bovine pleuropneumonia.
2. The embryos have been confirmed under microscopic examination by the embryo collection team approved by the Canadian Food Inspection Agency (CFIA) to have an intact, undamaged zona pellucida. The collection and processing of embryos has been done in accordance with the recommendations of the Manual of the International Embryo Transfer Society (IETS), third edition, by an embryo collection team approved by CFIA for the export of bovine embryos and which operates in accordance with the standards of the Office International des Epizooties (OIE).
3. The artificial insemination (AI) centre and the embryo transfer centre for the production of embryos for export have been inspected periodically and supervised by official veterinarians of the Canadian Food Inspection Agency.
4. During the six (6) months preceding the collection of the embryos and semen, none of the diseases listed below have occurred at the premises where the donor animals have been maintained: brucellosis, bovine tuberculosis, Johne's disease, leptospirosis, bluetongue, vesicular stomatitis, bovine viral diarrhoea (BVD), infectious bovine rhinotracheitis/infectious pustular vulvovaginitis (IBR/IPV), Campylobacter fetus infection, Trichomonas foetus infection and enzootic bovine leucosis.
5. There has been no occurrence in Canada during the past two (2) years of the following diseases: vesicular stomatitis, babesiosis, theileriosis or Akabane virus infection.
6. There has been no occurrence of anaplasmosis in Canada during the past two (2) years, **OR** the donor dam has been tested serologically for anaplasmosis with a test approved by the Canadian Food Inspection Agency with negative results.
7. All materials used for the production and storage of the embryos have been authorized by the Canadian Food Inspection Agency and sanitary precautions have been taken to avoid contamination by a causative agent of infectious diseases of domestic animals.
8. Each ampoule/straw containing the embryos for export has been labelled in accordance with the recommendations of the Manual of the IETS (third edition). The shipping container was sealed prior to shipment.
9. The embryos were stored in a secure location approved by the Canadian Food Inspection Agency for this purpose until the eligibility of the embryos to be certified for export was confirmed.

10. Donor animals were vaccinated against the following diseases during the six (6) months previous to embryo or semen collection:

Vaccinated against \_\_\_\_\_

Product used / date of vaccination \_\_\_\_\_ / \_\_\_\_\_
