

APPLICATIONS UNDER EXAMINATION

BOUVARDIA

BOUVARDIA
(Bouvardia)

Proposed denomination: 'Diamond Bordeaux'
Application number: 08-6427
Application date: 2008/08/14
Applicant: Bouvardiakwekerij de Jong vof, Roelofarendsveen, The Netherlands
Agent in Canada: Variety Rights Management, Oxford Station, Ontario
Breeder: John M.F. de Jong, Bouvardiakwekerij de Jong vof, Roelofarendsveen, The Netherlands

Description:

PLANT: tall to very tall

STEM: obtuse to quadrangular in cross section at middle third, light green on upper part, light brown on lower part, medium to long internode at middle third, weak to medium ramification

LEAF BLADE: medium to long, medium width, medium rigidity, ovate, medium intensity of green colour on upper side, sharp acute apex, attenuate base, straight in cross section, medium to strong blistering

PETIOLE: short to medium length

INFLORESCENCE: medium to long, medium to large maximum diameter, medium to large minimum diameter, many to very many flowers, dense

FLOWER BUD: medium red before opening

FLOWER: small to medium sepal, semi-double, mid season flowering

COROLLA: semi-erect attitude of outer lobes, large to very large diameter

COROLLA TUBE: very large at base of corolla lobes, medium to large diameter in middle part, short to medium length, dark purple red to dark pink red (RHS 53B-C) on outer side

COROLLA LOBE: long outer lobes, medium to broad outer lobes, one colour on upper side, red (RHS 45A-B) on upper side, no shading, rigid to very rigid outer lobes, broad ovate outer lobes, sharp acute apex, convex in cross section

ANTHER: petaloidy always present

STYLE: no petaloidy, medium length

Origin and Breeding: 'Diamond Bordeaux' originated from a controlled cross pollination of the proprietary seedlings '01.030.03' as the female parent and '99.096.12' as the male parent conducted in October 2003 in Roelofarendsveen, The Netherlands. A single seedling was selected in August 2005 based on improved floral and vegetative characteristics.

Tests and Trials: The detailed description of 'Diamond Bordeaux' is based on the UPOV Report of Technical Examination, application number BUV103, purchased from Naktuinbouw, Wageningen, The Netherlands. The trials were conducted by Naktuinbouw in Wageningen, The Netherlands in 2008. Colour determinations were made using the Royal Horticultural Society (RHS) Colour Chart.

Bouvardia: 'Diamond Bordeaux'

Proposed denomination: 'Green Magic'
Application number: 08-6426
Application date: 2008/08/14
Applicant: Bouvardiakwekerij de Jong vof, Roelofarendsveen, The Netherlands
Agent in Canada: Variety Rights Management, Oxford Station, Ontario
Breeder: John M.F. de Jong, Bouvardiakwekerij de Jong vof, Roelofarendsveen, The Netherlands

Description:

PLANT: tall

STEM: obtuse to quadrangular in cross section at middle third, light green on upper part, light brown on lower part, medium length internode at middle third of stem, weak ramification

LEAF BLADE: medium to long, medium width, medium rigidity, ovate, medium intensity of green colour on upper side, sharp acute apex, obtuse base, straight in cross section, medium to strong blistering

PETIOLE: very short to short

INFLORESCENCE: medium to long, large to very large maximum diameter, medium to large minimum diameter, very many flowers, dense

FLOWER: medium to large sepal, single, mid to late flowering

COROLLA: very small diameter

COROLLA TUBE: large diameter at base of corolla lobes, small to medium diameter in middle part, short, purple red (RHS 58B) on outer side

COROLLA LOBE: long to very long outer lobes, broad to very broad outer lobes, more than one colour on upper side, dark green (RHS 141C) on upper side, light blue pink (RHS 73C) along margin on upper side, no shading, medium rigidity of outer lobes, acuminate apex, convex in cross section

ANTHER: no petaloidy, white before anthesis

STYLE: no petaloidy, short to medium length

Origin and Breeding: ‘Green Magic’ originated from a controlled cross pollination of the proprietary seedlings ‘01.031.19’ as the female parent and ‘01.108.15’ as the male parent conducted in September 2003 in Roelofarendsveen, The Netherlands. A single seedling was selected in November 2005 based on improved floral and vegetative characteristics.

Tests and Trials: The detailed description of ‘Green Magic’ is based on the UPOV Report of Technical Examination, application number BUV105, purchased from Naktuinbouw, Wageningen, The Netherlands. The trials were conducted by Naktuinbouw in Wageningen, The Netherlands in 2008. Colour determinations were made using the Royal Horticultural Society (RHS) Colour Chart.

Bouvardia: ‘Green Magic’

Proposed denomination: ‘Royal Daphne Fresco’
Application number: 08-6428
Application date: 2008/08/14
Applicant: Bouvardiakwekerij de Jong vof, Roelofarendsveen, The Netherlands
Agent in Canada: Variety Rights Management, Oxford Station, Ontario
Breeder: John M.F. de Jong, Bouvardiakwekerij de Jong vof, Roelofarendsveen, The Netherlands

Description:

PLANT: medium to tall

STEM: obtuse to quadrangular in cross section at middle third, purplish red on upper part, brown on lower part, medium length of internode at middle third of stem, medium ramification

LEAF BLADE: medium to long, medium width, medium rigidity, ovate shape, medium intensity of green colour on upper side, sharp acute apex, obtuse base, straight in cross section, weak to medium blistering

PETIOLE: short

INFLORESCENCE: medium length, large maximum diameter, medium to large minimum diameter, very many flowers, dense

FLOWER BUD: medium pink before opening

FLOWER: small sepal, single, mid season flowering

COROLLA: semi-erect attitude of outer lobes, very large diameter

COROLLA TUBE: large diameter at base of corolla lobes, small to medium diameter in middle part, medium length, dark purple red to purple (RHS 59B-C) on outer side

COROLLA LOBE: long to very long outer lobes, broad outer lobes, one colour on upper side, blue pink (RHS 73B) on upper side, purple (RHS 67A) eye on upper side, no shading, medium to rigid outer lobes, broad ovate outer lobes, sharp acute apex, convex in cross section

ANTHER: no petaloidy, white before anthesis

STYLE: no petaloidy, medium length

Origin and Breeding: ‘Royal Daphne Fresco’ originated from a controlled cross pollination of the proprietary seedlings ‘98.368.02’ as the female parent and ‘01.178.08’ as the male parent conducted in September 2002 in Roelofarendsveen, The Netherlands. A single seedling was selected in August 2005 based on improved floral and vegetative characteristics.

Tests and Trials: The detailed description of ‘Royal Daphne Fresco’ is based on the UPOV Report of Technical Examination, application number BUV102, purchased from Naktuinbouw, Wageningen, The Netherlands. The trials were conducted by Naktuinbouw in Wageningen, The Netherlands in 2008. Colour determinations were made using the Royal Horticultural Society (RHS) Colour Chart.
