

Mark R.S. Johannes, L.H. Nikl, R.J.R. Hoogendoorn and R.E. Scott. 2011. Fraser River sockeye habitat use in the lower Fraser and Strait of Georgia. Golder Associates, Cohen Commission, Technical Report 12:114p. Vancouver, BC

**Report Errata to April 14, 2011:**

1. Harper and Quigley 2005- Reference, page 75 should be:  
*Harper, D.J. and J.T. Quigley. 2005. No net loss of fish habitat: A review and analysis of habitat compensation in Canada. Environmental Management 36(3):343-355;*
2. Table of Contents should include List of Maps similar to that listed on page 25;
3. Figure 2 caption in text page 29, and in List of Figures page 8, should be changed to:  
Figure 2: Sand dredge volume, disposal at sea and dredge to inflow sediment ratio in the lower Fraser River area. *Source: Fraser River Estuary Management Program 2006;*
4. Page 31, line 8, remove "fish" from (*plankton, fish*) and change to (*plankton*);
5. Page 32, 2<sup>nd</sup> paragraph, line 8 & 9, change entire sentence to read:  
*"Copepod and euphausiid zooplankton abundance also appear to be declining across the strait (Map12-C) consistent with patterns in the Northeast Pacific (Batten and Mackas 2009, c.f. Johannessen and Macdonald 2009)."*
6. Page 32, Figure 4. Units were not included on left hand y-axis, should be  $mg/m^3$ ;
7. Map 12-C : colour *chlorophyll a* legend scale should have units of:  $mg/m^3$ , not  $mg/km^3$ ;
8. Map 12-C: central copepod biomass figure panel should read "*Copepod Biomass (Medium 1-3mm in length) Strait of Georgia mid station*".

Technical Report 12: Fraser River Sockeye Habitat Use in the Lower Fraser and Strait of Georgia  
additional errata

As specified by Dr. Mark Johannes:

From transcript April 18, 2011, p. 18:

In regards to the errata sheet (Exhibit 735A), Dr. Johannes stated during the hearings that he would like to remove item number 4.
