Subject: Heiltsuk request to increase their FSC sockeye allocation for 2011

Hi Ross,

As per our conference call on Friday March 18, 2011 to discuss the 2011-12 Heiltsuk FSC Communal Licence, you indicated that the Heiltsuk are looking for an increase to their 20,000 piece sockeye allocation in their area for 2011. The case being, if the passing stock is strong this year, there will be an increase in effort to access these stocks on the outside of Area 7.

I mentioned that a formal letter will be required to address this increase in allocation request. The letter should include: your expectations for 2011 harvest or fishing opportunities on local stocks in the area; the specific area you intent to target the passing sockeye stock and the gear to be used; and any available empirical or anecdotal information respecting the reason/nature of the request and current and historical fishing activity (e.g. gear used, harvest time, catch).

Feel free to contact me if you would like to discuss the contents of this e-mail further.

Thanks,

K.
