

CASE NUMBER: 04F-24-P3-9

DATE: Mar 22, 2004

HISTOPATHOLOGY:

Slide 153, P3-9-1:

1). Heart, endocardia: Hyperplasia, minimal to mild, multifocal, random, subacute

There are no overt lesions within the spleen, kidney, liver, or heart.

Slide 154, P3-9-2:

There are no overt lesions within the spleen, kidney, liver, or heart.

COMMENTS:

There are no apparent lesions within the examined sections; the endocardial hyperplasia is consistent with a reactive change, possibly related to low grade, non-specific antigenemia.

FINAL REPORT
