Hi Dorothy.

Fry samples have been collected and are being sent away today for viral sampling. I would like to be able to cull the remaining fish tomorrow if you would give me permission.

Regards Judy Knutson

Dear Dr. Ang:

**Subject: Termination of Icelandic Atlantic Salmon fry**

Thank you for contacting me regarding the termination of your Atlantic Salmon fry that you obtained under permit from Stofniskur in Iceland. Health test results from fish submitted on March 15, 2005 have been returned to me from Microtek International Inc. and found to be satisfactory. If all fry from this import have now been destroyed, this letter will serve to end the agreement that was entered into by Stolt Seafarms and Fisheries and Oceans, Canada on January 5, 2005. If you wish to import eggs from this facility in the future, please contact me for inspections and permits.

Sincerely yours,

  
Mark Higgins
