We had agreed to a basic funding agreement. Their application has been received by BCTC. There has not been a decision for the parties to proceed with negotiations. Dfo should NOT issue a communal licence to this group at this time.

**Importance:** High

Kaarina,  
Just got a call from Bilal in Lower Fraser. He is wanting to move forward with drafting an agreement with Hwlitsum for this year. The agreement would be similar to last years and would primarily cover their attendance at meetings. His understanding is that you and Mel have had discussions on this and that you are in agreement with it. I told him that I would need to check with you before proceeding. Please advise.

He also asked my opinion on whether they should be issuing a communal licence to them for this year. The bands view is that the recent decision by the BCTC to accept their SOI paves the way for DFO to issue a licence (see attached). I suggested that a meeting might be in order before we headed down that road that would include yourself, me and Al. Thoughts?
