Subject: RE: Lab reports

Hello Stewart,

Absolutely every sample we received showed signs of degradation. If we compare them all, the kidney extracts showed less degradation than the others. Unfortunately, although "less", it was still much more than what allows conclusive testing.

Please let me know if you would like to discuss further.

Anne

Dear Anne,

Both of the lab reports you sent state that the diagnosis was Inconclusive for ISAV by QPCR. I know that the gill RNA was degraded but I thought the kidneys were OK. Can you confirm this?

Stewart

Subject: Lab reports

Hello Stewart,

Please find included the reports for GFC cases 2011-224 and 2011-227, relating to submissions of 48 frozen salmon carcasses and 48 frozen RNA extracts respectively, that we received from your laboratory.
