

Provincial probes/primers also shown and should pick up these sequences

DFO-603124

We would not pick up her sequences using these assays  
CFIA Reverse primer and probe also shown and match our sequence,  
1 mismatch to Kibenge's

# Alignment of our sequences (blue) compared to known ISA isolates and Molly Kibenge sequence

Note what we are picking up with ISA8\_2010 and Snow8 does match other ISA strains
