---

Hi all,

Thanks for this shipment,

And I just remembered you asked last week (or maybe the week before?) for our assays..sorry, I forgot after my initial attempt to get the documents.

The quickest thing at the moment is to give you primer and probe info, with conditions and kits we use.

Protocols and SOP are in document control and it takes longer to get.

<<...>>

Small error: PCR product is 169bp (not 179 - it's a Cohen's commission counsel who picked this mistake, wow!)

We have not published this .

If you use the assay on your samples I am interested to know.

Cheers

Nellie
