Subject: SUMMARY: WSPIT 14&15 May 2008

Hi, everyone!

There was a two day WSP implementation team meeting in Nanaimo last week, of which I didn't make the first day due to un-flyable conditions on the morning of the first day. But the first day sounds like it can pretty much be summed up by the draft workplan, which I will circulate when I get a copy and a review of the public meeting (see attached .ppt)

The second day's highlights include:

- continuing work on a communications & engagement strategy for WSP (internal, external, and other gov't)
- Yukon CU list is still outstanding - may or may not be ready by end of fiscal
- discussion on "**planning units**" - very very general concept is that we will manage/ plan according to "planning units". However, it has yet to be determined whether planning units will be bigger or smaller than CUs (probably both), single or multi- species (probably both), or how to align with management boundaries, fisheries areas, watersheds/other physical boundaries, assessment programs, etc.

-amh
