Max

I have removed the word collapse from Heather's draft. I don't think that is an accurate depiction of the state of Fraser River sockeye. May be the collapse of some Fraser River sockeye managers, but not the stock.

Max: I have revised this response based on direction from MO that are included in the TempInitial Request file.

MO comments that the Wild Salmon Policy is viewed as an indifferent document produced under political duress. I have sought to include all the elements suggested by MO, without making any incremental commitments. There has not been a decision to increase science, enforcement, etc beyond what was introduced for 2005, nor has a budget been provided.

Hi Heather,

This was returned with the comments from the MO. The comments can be found in the attached initial request and are very detailed. Let me know how you would like to proceed because based on Mr. Hearn's comments this letter will need to go through a few different sectors.

Thanks,

**Kelsie Doyle**
