Hi Jason,

On page 31 of the attached report, there is a reference to the minutes of the Integrated Harvest Planning Committee of May 6-7/09. I've copied text from the report (same as the IHPC meeting minutes) and 'pasted it below'. Are there any plans to consult on outcomes of the SEP logic planning model? I expect the question will be asked again this Fall and would like DFO to be prepared to respond. I believe Greg Savard or Cam West attended one the the IHPC meetings and advised the committee that the logic model was being completed.

Adrian

Salmon Enhancement Program Evaluation

SFC Question: How will DFO consult with First Nations regarding implementation of the new SEP logic planning model (determining production priorities), given First Nations concerns relating to assessment, conservation and production needs. First Nations also want to be involved in the evaluation; what process will be provided to do that?

DFO response: SEP staff are working on proposals, but are not ready yet to report on progress.

Secwepemc Fisheries Commission Quarterly Journal – Spring 2008-09

SFC Quarterly Journals are a compilation of progress reports from the staff of the Secwepemc Fisheries Commission. They are prepared to provide a comprehensive distillation of our results achieved in the previous quarter. They are submitted to Secwepemc communities and our various partners and friends either to fulfill contractual obligations or for purely information purposes.

Murray.
