Commission of Inquiry  
Into the Decline of  
Sockeye Salmon in the Fraser River

Dear Chief Justice Cohen,

I understand you are selected to head the commission into the inquiry of the decline of sockeye salmon in the Fraser River. I truly hope that you will investigate thoroughly the seriousness of the situation at hand and come to an honest assessment into the cause of this tragedy.

As a tax payer I must insist that the Funding of the inquiry be covered by the government for representing parties. We cannot let dollar and cents jeopardize research and the scientific evidence that is before us.

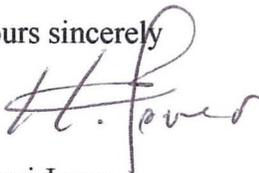

It's bad enough that we have to deal with raw sewage being dumped every minute of the day into the Georgia Strait by the province's capital Victoria and having to cope with the Pine Beetle infestation throughout B.C. but now, it's our wild Pacific salmon stocks that are without a doubt threatened like never before.

We place our trust in you Judge Cohen and that you will not let the wild stocks of British Columbia coastal waters fall victim to neglect and bias akin to what happened on the East Coast with the cod fishery.

If we don't take action to prevent the obvious and constant decline of our salmon stocks our children and children's children will never forgive us! And my conscious would haunt me for the remaining days I have left on this earth.

Judge Cohen you can be the person who saved our coastal salmon from virtual extinction. This is a legacy that will endure all time.

Yours sincerely
