December 17: Ucluelet - Court House	11:00 - 5:00

Seek your positive input on the following issues:

Should the initial allocations to the recreational and commercial sectors be
 based on the 1991-1994 catches?

Should the recreational sector be given priority access to Chinook and Coho in
 predicted periods of low abundance?

For any transfers of a share of the TAC from the commercial sector to
 recreational for such Chinook and Coho, should the recreational fishers be
 required to pay compensation from a fund created from increased licence
 fees?

Are the participants in the commercial fishery ready to institute a system of
 individual transferable quotas (ITQs)?

Should subsequent buy-backs and transfers of shares from the commercial
 sector to accommodate First Nations for Treaty settlements be paid for by
 government?

Should there be a system of Allocation Boards and an over-arching
 independent Tribunal to work out all allocations and planning problems?

Other - There may well be other recommendations with Dr. May's report that
 concern you and that I should consider.

Any interested participants unable to attend any of these meetings are free to
